June, 2023

## Chairman's message

June is the month of scorching summer as well as the onset of monsoon. As the temperatures soar and the sun blazes relentlessly, June serves as a reminder of the challenges posed by nature.

June is also the month when we observe World Yoga Day, World Environment Day, and World Music Day. When we combine the teachings from these realms, we find a unified idea that can add value to our lives: the pursuit of holistic well-being, interconnectedness, and harmony.

We can strive for holistic well-being by nurturing our physical, mental, and spiritual aspects. By embracing self-awareness, discipline, and inner peace through practices like yoga, we can achieve a sense of balance and fulfillment. By recognizing our interconnectedness with nature and adopting sustainable habits, we contribute to the well-being of the environment and promote a healthier planet. Finally, by embracing the universal language of music, we can find joy, cultural understanding, and harmony, connecting with others on a deeper level.

The hot summers of June in India bring about an atmosphere of intense heat, urging us to adapt and seek respite. This season reminds us that life often presents challenges and discomfort, and our ability to endure and adapt determines our strength and character.

Just as the scorching sun compels us to find shade and coolness, the trials we face in life impel us to discover our own sources of solace and renewal. The month of June thus offers an opportunity for introspection and personal growth, an opportunity to learn to thrive amidst adversity. In essence, by incorporating these principles into our lives, we can lead more meaningful, balanced, and fulfilling lives while making a positive impact on ourselves, our environment, and our interactions with others. The key is to delve deeper into the complexities of life and the

interconnectedness of various aspects. The idea is to seek greater wisdom and understanding beyond surface-level knowledge. As Gurudev Rabindranath Tagore had said,

“The small wisdom is like water in a glass:  
Clear, transparent, pure.  
The great wisdom is like the water in the sea:  
Dark, mysterious, impenetrable.”

Life is a journey towards this vastness, navigating the depth and mystery of knowledge, and emerging stronger and wiser for a better tomorrow.
